SUMMARY

Full-stack engineer focused on backend systems and DevOps-driven architecture. Experienced in building production-grade applications with Kubernetes, CI/CD pipelines, and observability. Strong in designing scalable APIs, distributed systems, and fault-tolerant services using Node.js, PostgreSQL, and Redis.

EXPERIENCE

YourWebsite.shop

Sep 2024 – Feb 2025

Frontend Developer Intern

New Delhi, India

- Built 23+ reusable UI components using React, Radix UI, and Framer Motion across production applications including Quiro, reducing design-to-development time by 35%.
- Developed and deployed a client-facing website Tatsat Yoga School using Next.js and Chakra UI, improving mobile usability across 10+ pages.
- Integrated 15+ REST API endpoints with centralized error handling and state management, reducing frontend runtime errors and improving reliability.
- Collaborated with backend engineers to define API contracts and data models, eliminating integration issues during deployment cycles.

PROJECTS

DevBoard (Live | GitHub)

- Built a full-stack task management app with React, Node.js, PostgreSQL, and Redis using JWT auth.
- Containerized with Docker and automated CI/CD using GitHub Actions.
- Deployed on Kubernetes with HPA, scaling from 2 to 5 pods.
- Load tested with 500+ requests; achieved sub-100ms P95 latency.
- Monitored system using Prometheus and Grafana.
- Tech Stack:** React | Node.js | Express | PostgreSQL | Redis | Prisma | Docker | Kubernetes | GitHub Actions | Prometheus | Grafana

Real-Time Collaborative Code Editor (Live | GitHub)

- Built a real-time collaborative code editor using Node.js, Socket.IO, and React, supporting multi-user editing with consistent state via an authoritative server model.
- Designed a room-based WebSocket architecture handling concurrent users with event-driven synchronization and isolation.
- Implemented reconnection logic and presence tracking to ensure session reliability during network disruptions.
- Tech Stack:** Node.js | Socket.IO | React | WebSockets

EDUCATION

Bharati Vidyapeeth's College of Engineering

B.Tech in Information Technology (CGPA: 8.22/10)

New Delhi, India Expected May 2027

SKILLS

Languages: C++, JavaScript, TypeScript, Python, SQL

Frontend: React.js, Next.js, Tailwind CSS, Chakra UI

Backend: Node.js, Express.js, WebSockets, REST APIs

Database & ORM: PostgreSQL, MongoDB, Redis, Prisma

Cloud & DevOps: AWS (EC2, S3), Docker, GitHub Actions, Linux, Kubernetes

Core Concepts: Data Structures & Algorithms, Concurrency, System Design, Event-driven Architecture, API Design
